

**Vice President**  
**Tambra Stevenson, MS**  
**E-mail:** [vp@mwpha.org](mailto:vp@mwpha.org)

Tambra Stevenson is the Vice President of Metro Washington Public Health Association. As part of the MWPHA, she also serves as the chair for the Committee on Food and Nutrition and the 2010 Annual Meeting. She is the founder/director of Creative Cause which use creativity to bring awareness and action to social and health issues. In April 2009 she coordinated the 1st Washington Women & Girls Wellness Summit for the Office on Women's Policy and Initiatives, an office she helped to launch in 2007. She also coordinated the first DC Victim Assistance Academy for the Mayor's Office on Victim Services.

Prior to that, she was instrumental in developing media opportunities, speeches, and materials for the National Director on minority business development in the US Commerce Dept. Featured as a 'rising star' in 'Federal Computer Week' Magazine, she helped to build the Young Government Leaders brand.

In 2004 she was selected for the Emerging Leader Program for the US Dept. of Health and Human Services serving in the Secretary's office. There she managed a wide range of projects from health IT, mental health, pandemic flu, diabetes to small business. While there she managed the Combined Federal Campaign to raise funds for charities for her office and was recognized with the Secretary's Leadership Award for achieving 200% of the goal. Prior to HHS, she worked on media/marketing projects at CBS HealthWatch, WGBH-TV (PBS), Harvard Magazine, Hill Holiday, Kelley Chunn PR, Tufts Medical School, and Boston Black Women's Health Institute.

With a M.S. in health communication from Tufts Medical School, she completed MBA coursework at Boston University. She obtained her B.S. in nutrition with a Spanish minor from Oklahoma State University. She studied and practiced community health in Dominican Republic on the David L. Boren National Security Education Scholarship. She received a certificate from New York University in partnership with the World Health Organization.
