

**Recent Research Trends in Cancer Prevention, Screening and Treatment:  
Implications for Public Health**

**Conference Objectives**

**At the conclusion of the Annual Meeting:**

1. Attendees will be able to describe the role that genetics and epigenetics plays in the research in cancer prevention, assessment and treatment
2. The attendees will be able to identify cancer prevention strategies and the role of nutrition and exercise in cancer prevention.
3. The attendees will be able to explain how cancer research advocacy addresses the social determinants of health for patients and family members experiencing cancer.
